# INTERNATIONAL SEARCH REPORT

International Application No.  
PCT/EP 03/02902

## Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☒ Claims Nos.: 8,9,13-17(partly)  
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:  
see FURTHER INFORMATION sheet PCT/ISA/210
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  
1-17 (partly)

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.  
☐ No protest accompanied the payment of additional search fees.

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 8,9,13-17(partly)

Present claims 8,9,13-17 relate to a compound/method defined by reference to a desirable characteristic or property, namely to reagent which specifically interacts with polypeptide or polynucleotide of BMP-2 inducible kinase or modulate the activity thereof

The claims cover all methods/componds/uses having this characteristic or property, whereas the application provides support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT for only a very limited number of such compounds/methods. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Independent of the above reasoning, the claims also lack clarity (Article 6 PCT). An attempt is made to define the compound/method/uses by reference to a result to be achieved. Again, this lack of clarity in the present case is such as to render a meaningful search over the whole of the claimed scope impossible. Consequently, the search has been carried out for those parts of the claims which appear to be clear, supported and disclosed, namely those parts relating to the compounds which are specific antibodies and anti-sense poly-/oligo-nucleoties.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

## 1. Claims: 1-17(partly)

An isolated polynucleotide being selected from the group consisting of: a polynucleotide encoding BMP-2 inducible kinase polypeptide comprising an amino acid sequence selected from the group consisting of:

- a)
  - i. amino acid sequences which are at least 72% identical to the amino acid sequence shown in SEQ ID NO.: 2 and
  - ii. the amino acid sequence shown in SEQ ID NO.: 2
- b)  
a polynucleotide comprising the sequence of SEQ ID NOs: 1 or 3
- c)  
a polynucleotide which hybridises under stringent conditions to a polynucleotide specified in a) and b), and which encodes said amino acid sequences;
- d)  
a polynucleotide the sequence of which deviates from from the polynucleotide sequence specified above due to the degeneration of the genetic code and which encodes said amino acid sequence;
- e)  
a polynucleotide which represents a fragment, derivative or allelic variation of the polynucleotide specified above and which encodes said amino acid sequence.

The subject matter of dependent claims 2-17 in relation of the isolated polynucleotide as above.

## 2. Claims: 1-17(partly)

An isolated polynucleotide being selected from the group consisting of: a polynucleotide encoding BMP-2 inducible kinase polypeptide comprising an amino acid sequence selected from the group consisting of:

- a)
  - i. amino acid sequences which are at least 72% identical to the amino acid sequence shown in SEQ ID NO.: 4 and
  - ii. the amino acid sequence shown in SEQ ID NO.: 4
- b)  
a polynucleotide which hybridises under stringent conditions

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

to a polynucleotide specified in a), and which encodes said amino acid sequences;

c)

a polynucleotide the sequence of which deviates from from the polynucleotide sequence specified above due to the degeneration of the genetic code and which encodes said amino acid sequence;

d)

a polynucleotide which represents a fragment, derivative or allelic variation of the polynucleotide specified above and which encodes said amino acid sequence.

The subject matter of dependent claims 2-17 in relation to the isolated polynucleotide as above.
